## If there's dirt in your pool, Phantom Turbo™ will find it.

Hayward's Phantom Turbo totally cleans your pool's bottom, walls and stairs and systematically rises to skim debris from the top of the water, too. That leaves you with the cleanest pool water ever. It even has enhanced water-jet-propulsion technology to deliver remarkable efficiency and improved performance reliability. You'll be convinced that Phantom Turbo is the clear winner. And now, so is your pool water.

Skims the Surface

Cleans the Bottom

Cleans the Sides

Cleans the Stairs

## The world's only total pool cleaner.

Phantom Turbo is definitely one-of-a-kind. In auto mode, it cleans your pool's bottom and sides for approximately 13 minutes. Then it rises to skim the pool's surface for seven minutes. It repeats this cycle until your pool is entirely clean. Phantom Turbo can completely clean the average pool in less than three hours. It's also flexible enough to clean only the bottom of your pool or just skim the top. Plus, the AquaDrive® water-jet-propulsion design eliminates the problem of powered wheels wearing the pool's surface. It's a custom-made clean only Phantom Turbo can deliver. To learn more about the unmatched cleaning power of Phantom Turbo today, visit [www.haywardnet.com](http://www.haywardnet.com).

**Cleans the floor, walls, and steps and skims the surface. Nothing escapes Phantom Turbo.**
